

**Help me to make  
choices through  
using sound  
symbols**

**Card  
31**

## **See whether my understanding that sounds can stand for other things can help me make choices:**

- find out who I would like to sit next to by offering me a choice of two jangly bracelets that two of my helpers wear
- find out where I would like to go by playing one windchime then another that are used to identify different rooms
- find out what activity I would like to do by offering me sounding objects of reference for one activity then another
- give me plenty of time to choose
- be sensitive to the way in which I express a preference – by looking, vocalising, moving, stilling or smiling
- once I can choose between two things reliably, try three or even four sounds
